Claim Constructions
Droplets, Inc. vs. Nordstrom, Inc., et al.
CASE NO. 4:12-CV-03733-JST

Claim Constructions

CLAIM TERM	CONSTRUCTION
application	“a software program that executes specific tasks for an end user” (ECF No. 429)
computer program code program code	“computer program code” and “program code” have their plain meaning. However, a “web address” or “hyperlinks” cannot be “computer program code” or “program code.” (ECF No. 429)
computer program code segments embedded with informational content stored at a second of said plurality of server computers	“instructions for a computer to execute embedded within informational content” (ECF No. 429)
interactive link link	computer code that (1) retrieves and presents applications and/or information stored at remote locations across the network when selected by an end user, and (2) includes facilities for restoring a particular user’s previous operating states of the application as the application is re-presented at a user’s computer. An interactive link cannot be a bookmark, cookie, shortcut, hyperlink or Internet address (URL) or use those elements to restore previous operating state. (ECF No. 749, ECF No. 801)
“previous operating state”	“must refer to a particular user’s prior state and particularly to modifications made to an application by the user.” (ECF 792, 10:20-21)
operating environment	“operating system, user interface, or hardware capabilities” (ECF No. 429)
Preambles of claims 1 and 17	Not limiting. (ECF No. 429)
presentation information for presenting an application presentational information	Plain meaning. (ECF No. 429)
presenting applications presenting the application	“presenting an interface enabling interaction with an application” (ECF No. 429)

presenting said invoked application	
presenting of the application	
presentation client program code	“platform independent software, running on a client computer, that can present remotely stored applications and that can transmit user input to remotely stored applications” (ECF No. 429)
presentation client	
“re-establishing” [a connection]	“[the connection] is established based on a previous connection and restores the previous operating state” (ECF 792, 17:16-18)
“selectively re-establishing [a connection]”	“the user is given an option of reloading or not re-loading the state information” (ECF 792, n.10)
